

RAPPORT DU PRESIDENT DE JURY APRES LA SOUTENANCE ET SIGNATURE DES MEMBRES DU JURY

Mme/M. Eric GAUSSIER Président(e) du jury

Panayotis Merikopoulos gave an excellent and extremely clear presentation of the complex and broad subject of online optimization and learning in games, a subject that builds upon optimization, machine learning, dynamical systems and game theory.

The committee was impressed by the knowledge and scientific culture of Panayotis Merikopoulos, as well as by the quality and volume of his contributions in both theory and applications, among which one can mention networks (including neural networks) and distributed computing.

The committee acknowledges that Panayotis Merikopoulos is an accomplished researcher, able to collaborate with people from different disciplines, contributing with original ideas and views on different problems, and sharing his great enthusiasm with students of all levels.

During the discussions that followed his presentation, Panayotis Merikopoulos gave in-depth answers and comments to the various questions asked by the committee, demonstrating again an excellent command of the concepts, methods and tools used in the different disciplines his work relies on.

For all these reasons, the committee awards Panayotis Merikopoulos the Habilitation à Diriger des Recherches, in Computer Science and Applied Mathematics,

from Université Grenoble Alpes
